

Professional & Experienced

The team at PCS has the skills and resources to handle your most difficult credentialing and management challenges. We have years of experience in practice start-up assistance, physician credentialing, facility credentialing, and managed care negotiations. Collectively, our team of experts have credentialed over 300 physicians and facilities in nearly every market across the country. We are well versed in:

- [CAQH administration and enrollment](#)
- [Medicare Group and Individual Credentialing](#)
- [NPI credentialing](#)
- [Managed care negotiation](#)
- [Commercial insurance credentialing](#)
- [Medicaid Credentialing](#)
- [Hospital or Facility Credentialing](#)

Quality Results

Our results speak of our ability to satisfy the needs of our clients. We employ advanced management and credentialing strategies that give our clients tangible results that positively affect their bottom line. We aspire to meet every deadline and always operate in a manner that is in the best interest of our client. We look at ourselves as a management partner to each of our clients and we want our relationship to extend beyond the terms of our agreement. It is important in healthcare today that you partner with medical professionals that understand the business of medicine and can deliver on their promises.

Increase Revenue

With our managed care contract negotiation service you can obtain greater reimbursements from the commercial carriers resulting in a net increase in insurance revenue between 5%-12%. With the rising costs in medicine and a deflationary economy, it is important that you find and capitalize on every avenue to increase revenue and improve your bottom line.

Decrease Headaches

Credentialing is a nightmare for most offices as the man hours needed are rarely available in physician offices. With office managers doing a million different things, it is sometimes impossible to stay on top of the credentialing process. That is where utilizing a professional services can make your office run more smoothly and reduce the overall stress level.
